Probably one of the most common requests in the surveillance equipment world is to be able to find out what somebody is doing on their mobile phone.

Spy Mobile Phone Recording and Tracking

Until about 8 years ago, being able to get access to this type of technology was limited to MI5 and the Police who sought the assistance of the network providers. Obviously, it isn't all about serious criminal offences that justify such lengths. Sometimes an employee may want to know what his employees are up to. Are they 'on the take' or selling company secrets? The way many solve these problems is through mobile phone monitoring and the only serious way to achieve this is using *spy mobile phone* software or providing an employee with a Spy Phone with the software pre-installed. There are many different types of spy mobile phones available, but what they all have in common is finding out what is going on when you're not around. We offer a wide range of these products allowing you to choose the model that best suits your requirements and budget. Spy Equipment UK is able to offer a decent range of fully working modern Nokia, Samsung and Blackberry handsets with the spy mobile phone software pre-installed, giving text forwarding capability as well as being able to dial into the phone and listen to what is happening on the phone. All functions of the Spy Phones are controlled from what is known as your Pre-Defined Number meaning only you can access the secret functions of these spy gadgets. Other spy mobile phone units are classified as dead phones in that they cannot be used as working handsets as such but instead give the impression that they are switched off or 'dead'. Call into this type of spy phone and the phone will auto answer opening up the sensitive microphone and enabling you to listen into a large surrounding area. Whatever your requirements, our spy shop will have one to fit your needs and budget.

Android Spectre Spy Phone Software

Android Spectre is a superb spy phone software designed for monitoring mobile phones that use the Android operating system (NOT for iPhone). Completely discreet and packed with desirable features it is easy to see why this has become the preferred choice for our customers.

Product Code: SP3C

£50.00 (exc. VAT) £60.00 (inc. VAT)

Android Spectre software is often the perfect solution for monitoring someone's daily activity if they have an Android mobile phone that they carry with them everywhere that they go.

If you are worried about the safety of your child, an elderly relative or maybe you suspect that one of your employees is using the company mobile phone for illegal activity, then this spy phone software could be the answer. Now with added short term purchase options!

Wide Range of Monitoring Features

This software offers more totally discreet monitoring features than our other spy software applications. You will be sent details and recordings of all phone calls, text messages (SMS) including message content, photographs taken by the phone, GPS locations of the phone every 30 minutes or when phone is rebooted (network location if no GPS available). You will be notified when the phone is switched on or off and of any new applications downloaded onto the phone. * On top of all this the software has the ability to capture incoming notifications, photos and alerts from WhatsApp, Facebook Messenger, Viber and Skype (these notifications normally show at the top of the phone screen as a shortened message when another application is open).

Remote Control On-demand Surveillance

There are certain monitoring features that can be requested on-demand by SMS. Request to switch on the microphone to record what is going on around the phone for 5 minutes, request the current GPS location, get the monitored handset to take a photo using the front facing camera, get a photo captured by the rear facing camera, remotely turn the WiFi on or force the mobile data to turn on (this

Features

- Superb spy phone software for use on all handsets using Android operating system (handsets include Nexus, Motorola Sony, One Plus One, Most HTC and Samsung and LG)
- Install in less than 5 minutes – very simple to set up and use
- Incoming and outgoing calls – get call information data (including phone numbers) and a call recording
- Incoming and outgoing text messages – get SMS information (including phone numbers) and the content of text message
- GPS Locations – get a GPS location every 30 minutes and when phone is rebooted. Get approximate 'Network' locations when no GPS is available and receive a current location map
- Incoming notification alerts – Get incoming notifications for Whatsapp, Facebook Messenger, Viber and Skype – shortened version of message shown (only when app is not being used)...

Android Ultra Spy Phone Software

This specialist spy phone software has been designed for Android phones. Once installed it can monitor a wider range of phone user activity than any other spy phone software available. Chosen by customers who do not want to leave anything to chance. Now with keyboard input logging!

Product Code: ULT1

£80.00 (exc. VAT) £96.00 (inc. VAT)

The Android operating system currently holds a 75% share of the Smartphone market. Because it is so widely used, making a spy phone software to monitor Smartphones using the Android platform was an obvious choice. Our Android Ultra Spy Phone Software quite simply is, without question, the most advanced available (NOT suitable for iPhones).

Keep an Eye on a Relative - Monitor a Wayward Employee

After installation on the handset, the phone's standard functionality remains totally unaffected by the spy software programme. It runs unsighted and works away in the background, sending out an incredible array of information to a secure web-based monitoring panel. The Ultra Android spy phone software is an ideal solution for keeping an eye on your children or an elderly relative for their protection and safety. Employers may have a need to monitor employees suspected of using their company phone for illegal or inappropriate activity.

Easy to Install - No Special Setup Required

After purchasing the Android spy software package, the customer will receive instructions and a download link to their email address within 24 hours (except weekends and Bank Holidays). The download link is then inputted into the browser for the Android phone and the software can be downloaded and installed in minutes, after which a unique ID code is shown on the screen of the phone. This information has to be noted and subsequently emailed to Spy Equipment UK and then the software licence can be authorised. After the licence has been confirmed, the customer will have unlimited access to their secure login to the panel 24 hours per day for the licence period.

Ch

Features

- The ultimate in spy phone software providing a vast array of monitoring features with no special technical ability required to use
- Ready to install on wide range of Android phones such as Samsung Galaxy series, HTC One series, Sony Xperia series, LG series, Nexus series, Motorola, Huawei and many more
- Software application is totally hidden from app tray (except Android 10 OS), system or running apps – almost impossible to uninstall even if security wipe is completed
- Information gathered of monitored phone usage automatically forwarded to a Web panel – secure unlimited access login to view harvested data
- Standard call recording with phone number, and/or contact name, duration, date and time of call – recordings playable after download...

Ultra  Monitor

This Samsung Galaxy S7 is a fully functional Smartphone that has been installed with specialist spy phone software that can monitor a wider range of phone user activity than any other spy phone available. A high quality grade A reconditioned handset with our best spy phone software. Now with keyboard input logging!

Product Code: 7SPY

£470.00 (exc. VAT) £564.00 (inc. VAT)

The Samsung Galaxy S7 is still quite a desirable handset and this is why we have retained this Smartphone as one of our spy phone offerings. Not only is the phone handset desirable, but the spy phone software we install is, without question, the most advanced available.

Monitor Your Children - Check on Employees

All of the phones standard functionality is retained and unaffected by the spy software that runs in complete secret in the background on the phone feeding a comprehensive array of information and data out to a secure web-based monitoring platform. This spy phone is the perfect solution for keeping an eye your children for their own protection and also by giving you reassurance that they are safe. As an employer, it is also suited to keeping tabs on employees who you suspect use their company phone for illegal activity. The Samsung Spy phone may also be considered to safeguard / track an elderly relative for their well-being.

Supplied Pre-programmed - No Set Up Needed

The Galaxy S7 spy phone is a high quality grade A reconditioned handset supplied without a SIM card and is unlocked to all phone networks and although the person who is given the phone will have to set up the standard phone functionality to there preferred settings, this is no different to any standard phone of its type. At the time of purchase the customer will be required to supply an email address. This information is used to configure the software on the spy phone prior to despatch to the customer. This ensures that the spy phone functionality will be ready to use out-of-the-box; with no further setup needed by the customer.

Superb Array of Spy Phone features

The S7 Galaxy Ultra

Features

- The ultimate spy phone couples a desirable handset with the most advanced spy phone software available
- Grade A refurbished Samsung Galaxy S6 Edge Smartphone – unlocked in a choice of either black, gold or white
- Spy software already installed and configured – absolutely no technical knowledge required – no downloading or setup needed
- Spy phone software application is totally hidden from app tray, system or running apps – almost impossible to install even when security wipe is completed
- Information gathered of spy phone usage automatically forwarded to a Web panel – secure unlimited access login to view harvested data
- Call recording with phone number, and/or contact name, duration, date and time of call – recordings playable through web panel or downloadable...

Infinity Spy Phone (Tri-band)

This Nokia phone looks like it is switched off, but it has been modified and can be used as a listening device. This spy phone model is based on a tri-band phone, which means it has worldwide deployment capabilities.

Product Code: INF2

£209.00 (exc. VAT) £250.80 (inc. VAT)

Spy phones are adapted classic style Nokia phone handsets that have been modified to turn them into room bugs. They were the first type of GSM bug and still remain favourites for some of our customers because they simply look like a phone where the battery has expired or an old handset that does not function any more.

Spy Phone Adapted to Give Appearance of a Dead Phone

All standard features on the phone have been switched off through the software so that the screen does not come on and the buttons do not light up or respond in any way. The call receive function, however, is still maintained so that the spy phone is able to receive and auto-answer an incoming call. When the call is answered, the microphone is switched on and the caller is able to listen in to the surrounding environment. A cleverly thought out listening device that masquerades as an old classic phone!

Enhanced Microphone Sensitivity

Some spy phones use the standard microphone of the handset and as such the listening radius of the microphone is normally limited. This is because standard mobile phone microphones are designed to filter out background noise and only be sensitive enough for someone to speak directly into the phone. Because the Infinity Spy Phone is not used to make 'normal' calls, we have enhanced microphone sensitivity and the result is an audio pick up radius of at least 8 metres - making it a sophisticated GSM bug.

Innocuous Short Term Listening Device

The Infinity Spy Phone is the perfect room bug for an office t

Features

- GSM type listening device made from adapted mobile phone
- No standard mobile phone capability – screen and buttons have all been disabled
- Auto-answering GSM engine – enhanced microphone technology
- Excellent listening radius of up to 8 metres for normal speech
- Tri-band network coverage 900/1800/1900MHz – works in most countries worldwide
- 5 hours of listening in time and/or 4 days standby time
- In original boxed with charger and Orange or Virgin SIM card
- Works on other phone networks although audio quality is less clear
- Optional external microphone for varied deployment possibilities (see package options)

Please note that more information available online.

Infinity Spyphone

This Nokia phone looks like it is switched off, but it has been modified and can be called without showing any indication that it is active. This modification means that the spy phone becomes a room or car bug.

Product Code: INF1

£201.00 (exc. VAT) £241.20 (inc. VAT)

Spy phones are adapted classic style Nokia phone handsets that have been modified to turn them into room bugs. They were the first type of GSM bug and still remain favourites for some of our customers because they simply look like a phone where the battery has expired or an old handset that does not function any more

Nokia 6120 Spy Phone

The 6120 Spy Phone has all the functionality of a normal handset and will operate as such, but it also features a range of powerful surveillance tools built in as standard that allow for monitoring of this phone remotely.

Product Code: 6PHN

£199.00 (exc. VAT) £238.80 (inc. VAT)

This Nokia spy phone is set up with pre-installed monitoring software. All that is required is the entering of the mobile phone number of the phone that is going to be used to monitor and control this spy phone before it is given to the person under surveillance.

Get SMS Messages - Listen-in to Surroundings

Phone monitoring software is designed for monitoring your children for their own protection and reassuring you that they are safe. It is also suited to keeping tabs on employees who may be using the company phone for illegal activity or to safeguard / track an elderly relative for their safety. The spy phone features of this handset will put you back in control. Get copies of SMS messages, listen-in to what is going on around the phone (when not on a call), listen-in to live calls (Vodafone and Orange networks), track the phone (based on phone mast proximity) plus a number of other superb features.

Pre-installed Software - Easy Setup

The spy software functionality is pre-installed and activation to suit your needs is a matter of send a couple of SMS messages, so getting started is very easy. The software application is hidden away within the operating system and therefore is totally covert and absolutely discreet in operation as well.

Remote Access From Another Phone

Once activated the surveillance features can be remotely accessed and controlled by another mobile phone. Commands to control the powerful spy features are sent to the spy phone by SMS, so there is no requirement to have regular access to the 6120 handset and no need to register on an online monitoring platform. Although an older phone, this device is still popular due to its cost and simple operation that needs no in

Features

- Nokia 6120 Phone (Grade A Refurbished) supplied with spy phone features pre-installed
- Simple to set up out of the box
- Control the spy phone remotely from another mobile handset
- Spy application is hidden in phone operating system and is totally discreet in operation
- Spy Bug – Listen into surrounding environment of the phone
- Spy Text – Sends out copies of all incoming and outgoing SMS messages
- Spy Alert – Notifies by SMS of call being made or received by spy phone
- Spy Call – Listen into 'live' calls (requires call conferencing enabled on the network, which also normally means a contract)
- Spy Boot/SIM – Notifies by SMS when phone is switched on or if SIM card is changed
- Nokia 6120 phone supplied is unlocked for any network SIM card

Please note that more information available online.

Samsung Galaxy S10 Plus Spy Phone

This Samsung Galaxy S10 Plus is a fully functional Smartphone that has been installed with specialist spy phone software that can monitor a wider range of phone user activity than any other spy phone available. Chosen by those who demand the best. Now with keyboard input logging!

Product Code: SP10

£1030.00 (exc. VAT) £1236.00 (inc.

VAT)

The Samsung Galaxy S10 is the currently the most desirable handset to own and this is why we have currently chosen this Smartphone as our top-of-the-range spy phone offering. Not only is the phone handset 'one to have', but the spy phone software itself is, without question, our most advanced available.

Monitor Your Children - Check on Employees

All of the phones standard functionality is retained and unaffected by the spy software that runs in complete secret in the background on the phone feeding a comprehensive array of information and data out to a secure web-based monitoring platform. This spy phone is the perfect solution for keeping an eye your children for their own protection and also by giving you reassurance that they are safe. Samsung Galaxy S10E Spy Phone

This Samsung Galaxy J5 Smartphone has all the standard functionality of the standard phone unit, but we have preinstalled our latest spy phone software offering a massive array of fantastic features for monitoring activity of the user of the phone. Now with keyboard input logging!

Product Code: S10E

£765.00 (exc. VAT) £918.00 (inc. VAT)

This popular Smartphone can be used in a normal manner, retaining all the functionality of a standard Samsung Galaxy S10E handset, however it has been programmed to secretly spy on almost everything that the phone holder does whilst using the handset.

Monitor Your Children - Check on Employees

This type of spy monitoring software is the ideal solution for monitoring your children for their own protection and giving you reassurance that they are safe. It is also suited to keeping an eye on employees who may use the company phone for illegal activity. The software is also perfect to safeguard / track an elderly relative for their safety.

Supplied Ready to Use - No Setup Required

The Samsung Galaxy S10E is regarded as a premium feel Android Smartphone marketed at an affordable price. It has a large screen, a modern look and feel coupled with excellent functionality offered by the Android operating system. The phone is supplied unlocked for all networks, ready to use as an everyday phone and pre-programmed with our latest Android Ultra spy software. At the time of purchase the customer will need to select from either black or gold coloured handsets. It should be noted that Spy Equipment UK do not hold a stock of handsets, so next day shipping is not offered, albeit generally we are able to ship within 48 to 72 hours. The phone is supplied rooted and pre-programmed with the software so it can be used straight out of the box with no further set up being required.

Easy to Use Software - Feature Rich

A secure account on the monitoring panel is already set up and ready to use. The S10E Galaxy spy phone has the most comprehensive range of spy phone features available. Most information automatically r
