## Spy Camera Packages

This section contains full spy camera systems for body worn, portable and other hidden camera deployment situations.

### **The Perfect Solution**

Rather than leave the hard work of selecting matching items to our customers, here at Spy Equipment UK we have taken the hard work out of creating the perfect system by grouping together spy cameras and recording systems that work in perfect synergy. These spy camera packages are absolutely ideal for Private Investigators engaged in undercover surveillance work, for Mystery Shoppers who want suitable professional body worn and portable solutions to conduct their regular covert tasks with ease and for any other serious covert surveillance customers who want the perfect solution in one!

## Bag Camera Ultimate Package

The Bag Camera Ultimate Package is law enforcement grade evidence gathering tool with time/date stamping and full high definition quality video capability. A must for surveillance professionals including Mystery Shoppers and Private Investigators.

Product Code: BAGC

£459.00 (exc. VAT) £550.80 (inc. VAT)

The Ultimate Bag Camera/DVR package is law enforcement grade evidence gathering tool with time/date stamping and top-end quality video capability. This bag with portable spy camera is used for Mystery Shoppers, Private Investigators and other surveillance professionals.

### Compact Bag - Totally Covert Camera

The superb bag camera is fitted with a super high-quality CMOS, 0.03 lux covert camera unit that provides super-sharp imagery and vivid colours and includes a high gain microphone. This covert camera unit fitted with a wide angle (78 degrees) lens which makes it very easy to obtain the required shot even at close range. The portable spy camera is located in one end of the compact shoulder bag, cleverly built into the zip thereby making it almost impossible to see with the naked eye. The camera is powered from the recording unit, which itself has a rechargeable lithium Ion battery pack, which is also changeable, which makes it simple for quick redeployment (see drop down for spare battery pack).

### Record Broadcast Quality Video with A Portable Spy Camera

The MP4 Recorder features a maximum resolution of 1920 x 1080 (1080P HD Mode) and an SD recording system that supports SDHC Cards up to 32GB (16GB supplied as standard). This quality unit has a built in colour LCD screen with touch screen menu system for easy playback of recorded footage and adjustment of recording settings should this be required. The recorder can be removed entirely from the bag if required or the SD card removed for playback of the footage on a computer screen. Video footage captured by this portable spy camera is classified as broadcast quality and has time/date water

## Button Camera Ultimate Package

The Ultimate High Quality Button Camera/DVR package is law enforcement grade evidence gathering tool with time/date stamping and full HD quality video capability that is ideal for Mystery Shoppers and Private Investigators.

Product Code: ULTB

£342.00 (exc. VAT) £410.40 (inc. VAT)

This is our ultimate 1080p high definition button camera with MP4 recorder package. Producing pin-sharp imagery and with superb audio clarity, this versatile package is the ideal body-worn choice for surveillance professionals.

### Professional Grade HD Camera

The superb button camera is a high quality 1100 TV lines CMOS unit giving super-sharp imagery and vivid colours. This is fitted with a wide angle (78 degree) lens which will be easily wide enough to keep subject matter in view for face to face work. The auto-focus on the camera can even read reasonable sized prints at close range. The camera has an exceptionally low light capability making it useful for recording in reduced light situations. The camera has small dimensions and is connected to the MP4 recorder by a lightweight and flexible HDMI cable. Three different interchangeable button size options are supplied as well as two screw heads. Each screw-on camera-mounted button has a set of matching buttons to complete a garment being adapted.

### Two Recorder Options Available

This unit can be purchased with or without a screen. Both have the ability to setup and live view what the camera is seeing using your smartphone (free app can be downloaded.) For those who would prefer a screen, there are also intuitive touch-screen menus allowing settings to suit to be selected very swiftly and also the ability to playback recorded media on the MP4 itself. Both recorders feature a maximum resolution of 1920 x 1080 (1080P HD Mode) and an 720p lower definition recording and supports SDHC Cards up to 32GB (16GB supplied as standard).

### Time and Date Watermarked Video Stamping

Constructed from quality materials, the MP4 has an SD card recording system with
