

Universal Telephone Recording Lead

This is effectively an earpiece that has a special microphone built into the earbud as opposed to a little speaker. This little accessory enables easy recording of phone calls when connected to a recorder.

Product Code: UTR1

£24.95 (exc. VAT) £29.94 (inc. VAT)

This neat little product allows you to discreetly record telephone calls that you make on both mobile and landline phones.

Use With Separate Audio Recorder

Simply plug the connector plug into a suitable recorder, place the earphone bud in your ear and put whatever phone earpiece you are using up to the same ear. You will still be able to hear perfectly what is being said, but you can choose to press record on an attached recorder (not supplied) to record both sides of the conversation. Choose when to start and stop the recording of what you are hearing and saying during the call.

Discreet Call Recording Operation

Using this device gives no indication to the person with whom you are speaking that you are recording the call and the beauty of this product is that it can be used when making calls on any phone providing a simple and effective way to protect your interests. Any easy product to carry around ready for use when you need it.

Consider Getting a Recorder

No special audio recorder is required for connection to the Universal Telephone Recording Lead, but of course it is advisable that the unit is small enough to easily carry around with you. If you do not have your own recorder already then we can supply an one if required (see voice recorders section for Voice Recorder Pro or Voice Recorder Ultimate).

Features

- Can be used when making calls on any phone landline or mobile
- Special microphone will pick up audio from both sides of conversation (what you are saying and what the caller is saying)
- Carry in your pocket for use anywhere
- Great for recording calls to protect your interests or to recording calls that you are receiving that may include harrassment
