

4/6 Gang GSM Recording Package

This package has been put together to give you everything you need to listen in anytime, from anywhere in the world and get proof of everything you are hearing.

Product Code: GAPK

£305.00 (exc. VAT) £366.00 (inc. VAT)

This package has been put together to give you everything you need to listen in anytime, from anywhere in the world and get proof of everything you are hearing. Includes:

4/6 Gang PlugBug

The GSM 4/6 Gang PlugBug can be simply plugged into any mains socket available to remain permanently powered, ready for dial in anytime, anywhere. The SIM card concealed within the unit can be dialled to activate the GSM module, this allows you to listen to the surroundings of the unit for up to a 8 metre (25ft) radius. **Please see 4/6 Gang PlugBug for full details.**

Bluetooth Call Recorder

This is a superb versatile recorder that can be used as either a dedicated mobile phone call recorder or as a stand-alone room recorder with a super-sharp sensitive microphone. With bluetooth link up, there is no need for a physical connection between the recorder and the mobile phone that you are recording from. With a large in-built recording memory, it is easy to record clearly what you hear when listening in to the GSM Bug. Supplied with USB lead for easy playback and transfer via a computer. **Please see Bluetooth Call Recorder for full details.**
