

## HD Video/Voice Recording Spy Pen

The new high definition spy camera pen with video and voice recording features provides the facility to make HD video recordings together with high-quality audio as standard and can be switched between straight and motion activated recording modes.

Product Code: PENC

£135.00 (exc. VAT) £162.00 (inc. VAT)

A quality stylish slimline spy pen manufactured using quality materials in a black and gold finish. Not only is the pen manufactured to an extremely high quality, but it also has outstanding compatibility, performance and functionality.

### Ultimate Spy Camera Pen

At just over 13mm thick the *spy pen* is slim in comparison to cheaper bulky products offered elsewhere and because it records on MJPG bit rate of 16.4 Mbps rather than MJPEG4 so you can even watch back footage directly onto your TV. The extremely small camera is located just above the pen clip and is very discreet. The pen can be used to write in the normal manner, but when obtaining video footage the pen is best clipped into the top pocket of a shirt or jacket to capture events when worn on the person or when left behind at home or in the office. There is also the option of setting the device to record motion-activated footage and this instance it could be deployed clipped into a jacket or blazer pocket that is on a hanger or draped over the back of a chair. The audio recording on this device is not a secondary consideration. As such audio recording quality is excellent and with a sensitive microphone the audio pick up range is at least a 6-metre radius. The pen is ideal to capture important audio from situations such as meetings, interviews or where verbal abuse or slander maybe apparent.

### High-Resolution Photographs

As well as video and audio, the Video/Voice Recording pen has the ability to take high-resolution snapshot photographs discreetly. When activated in motion activated or continuous modes, all that is captured is time and date stamped, which is ideal especially if you require recorded footage for evidential purposes. Video footage can be p
