

## Spy Glasses Camera / DVR - HD

These spectacles feature a discreet spy camera and built in DVR producing high definition 1080p quality footage. Simple to operate and suitable for both sexes, these spy glasses are perfect for face to face body worn video surveillance.

Product Code: GLA5

£145.00 (exc. VAT) £174.00 (inc. VAT)

The Spy Glasses Camera with built in DVR are designed to be worn to capture video footage of the subject matter in 1080p high definition. The spectacles design is lightweight and of a modern style that can be worn by both male and female users.

When conducting video surveillance on-the-move the ideal spy tool is something that can be completely discreetly worn on the person and can operate hands-free. To achieve this the camera system needs to be incorporated into an everyday item. This is where the Spy Glasses Camera system scores very highly because the pinhole camera will always be pointed toward where the wearer is looking.

### More About Our Spy Glasses Camera / DVR - HD

The glasses are fairly lightweight and although they are of a heavier framed design, they still are very discreet. The high definition spy camera is located in the centre of the nose bridge facing forwards. The DVR has a 8GB internal memory built into the arms and the device also records audio in conjunction with the HD video footage. The body worn spy camera system is very easy to use, so getting video recording started is a matter of using a single switch to start/stop, set video recording or taking a still photo. The device has an inbuilt rechargeable lithium battery that can be recharged from a USB connection. The glasses are supplied with a glass cleaning cloth and USB charging cable which can also be used to transfer the files onto a computer and a USB mains charger plug. A straight recording time of up to 75 minutes is achievable after a full
