

Android Spectre Spy Phone Software DEMO

Android Spectre Spy Phone Software

Product Code: ANDSPECDEMO

£0.00 (exc. VAT) £0.00 (inc. VAT)

This is a FREE trial of our well regarded Android Spectre Spy Phone Software. The object of the trial license is so that customers can understand how the system works, test its capabilities and therefore be assured prior to making a purchase of the product. It maybe that you wish to test the software on your own Android phone to see how it functions before making a purchase of the software to installed on another handset that you wish to monitor. Or you may wish to install on the handset that you wish to monitor from the outset, with a view to extending the license after evaluating the software. The FREE demonstration license is only for a 24 hour period. A license code ready for installation will be automatically sent to the email address specified after the demonstration request has been completed through the website. This demonstration software gives you all the facilities of a purchased Android Spectre software for a period of ONLY 24 hours. After this period has expired the software functionality will be withdrawn without the need for uninstallation from the phone handset onto which is has been configured to monitor. An extension of the time period for the license can be ONLY remotely configured by the Spy Equipment UK staff after a confirmed purchase has been completed. The Spy Equipment UK office is NOT staffed 24 hours a day and as such upgrading to a 3, 6, 12 or 24 month paid license will only take place during UK office hours specified on the Contact Us page of our website. Reinstallation of the demo software onto the phone handset being monitored will not be required to upgrade to a paid license package.

Please Note

This software is ONLY designed for installation onto
