Product Code: PCS9

£80.00 (exc. VAT) £96.00 (inc. VAT)

The Global PC Spy is a completely undetectable Windows computer monitoring program that offers a vast array of features. The software provides the capability to remotely and secretly watch and hear live; as well as log activity on the computer for later review if live monitoring is not possible at certain times.

Simple to Deploy -Easy to Use

The software is supplied on a USB stick and can be installed on the target PC in seconds. No prior specialist knowledge is required. Simply start the installation from the USB stick and after a few seconds an ID number will show on the computer screen (which must be noted). At this point the software is installed and the USB stick can be removed leaving the software to work for you. Remote surveillance is made easy because the monitoring panel, which is a website that has a secure login. This means that it is possible to keep watch on the target computer's activity from any web-connected device (desktop, laptop, tablet, etc.)

Protect You Business - Keep Your Child Safe

Computer monitoring software and key-logging devices are used by parents concerned about the safety of their children whilst they are using a computer, particularly when they are online where they are potentially exposed to the predatory behaviour of others, bullying and inappropriate websites. These products are also ideal for safeguarding sensitive data on company computers and for monitoring employees who maybe conducting illegal activities using the company PC.

Live Monitoring - See/Hear as it Happens

Unlike previous products that we have been able to offer the Global PC Spy allows in a number of ways to remotely sur
