

Bluetooth Speaker Camera

This is a working bluetooth speaker that has a WiFi and IP enabled spy camera and recording system cleverly concealed within. Full HD quality video footage with superb audio recording all make it perfect for covert room surveillance with the ability to remotely and control from afar.

Product Code: BT5C

£245.00 (exc. VAT) £294.00 (inc. VAT)

Fitting a new type of everyday device into a room setting in order to obtain covert video and audio surveillance is an ongoing challenge. The Bluetooth Speaker Camera system certainly fulfils the criteria because it is an unobtrusive item that can fit easily in a modern room setting, with the bonus that it will function perfectly as you would expect a standard bluetooth speaker should. A perfect spy camera for the home or office.

WiFi and IP Capability Built-in

Want to watch what is happening live? This unit has both WiFi and IP capability so by using an app on your Smartphone or tablet you can watch streamed video, with audio from the other side of the world if you wish (requires local router link-up). Alternatively you can remote control, stream video and setup the camera system without need for a router from a distance of up to 50 metres. You can download recorded video, set the time to match that on your smartphone or tablet, start/stop recording, format the SD card and even hide the SSID so nobody else can detect your covert camera unit. The video recording memory storage is a micro SD card system that has a maximum capacity of 32GB (a 16GB card is included as standard).

Automatic Motion Detection Recording

Although it is good to be able to view [live](#) footage, it is not always possible to watch as it happens, so probably one of the most important features of a spy camera system must be the ability to record video footage in response to motion in front of the camera!

Features

- Nice, clean generic design of 'working' bluetooth speaker with in-built covert spy camera and DVR
- Functions like a normal bluetooth speaker enabling playback of music and sounds from your smartphone or tablet
- Wide angle camera discreetly included in one of the vertical grilles giving correct aspect when on a desk or table in its natural position
